About Me

I am a Medical Engineer, full of motivation and always looking to learn and explore, a 'hands-on' person with a 'can do' attitude. I have a desire and drive to tackle complex problems, Independent and capable of taking ownership of issues from end to end.

Education

- **M.Sc. Neurobiology and behavioral brain sciences student, 2020-present**
Prof. Shamgar Ben-Eliyahu's neuro-immunology lab, The Faculty of Life Sciences, Tel Aviv University. **Research topic:** The effects of stress and inflammation on cancer progression in the perioperative timeframe.
- **B.Sc. Medical Engineering, The Afeka Tel Aviv College of Engineering 2016-2020**
 - **Specialization:** Medical Information Systems
- **Python Programming, learning with 'SheCodes;' organization 2018-present**
- **web development, coding bootcamp with Avenews-GT company 2018-2019**
- **Full matriculation, Sciences program, 'Terra Santa' high-school, Jaffa 2013-2015**

Professional Summary

Adept at recognizing clinical values and abstracting data from source documents. Using analytical skills to identify data or patient safety issues, administrative and clinical capabilities with knowledge of human anatomy and physiology.

Relevant Courses & Completions

- Matlab
- Image processing
- C programming
- Biology of the Cell
- Physiology and Control Systems in Human Body
- Data Mining
- Radiation in Medicine
